

SAI STREET SERIES

a better way to make planters

A photograph of a modern outdoor space featuring two large, curved planters made of natural stone. The planters are filled with green plants and are set on a paved area with a pattern of light and dark grey stones. The background shows a green lawn and a building. The entire image is framed by a dark green border.

About Us

About Us

I

Sai Stone is your trusted brand for the supply of natural stone products and solutions.

Established in 2005, Sai Stone wholesales selected premium stone products to brick, paver and tile stores across Australia's East Coast.

We are proud to have been involved in numerous residential, commercial and government construction masterpieces through Sai Stone - 'STONE FOR PROJECTS'. Some of our major contributions include Melbourne City Council projects, the Royal Adelaide hospital and the Castle Hill Station by Northwest Rapid Transit Sydney.

Customer-Orientated

From design to delivery we aim to help bring your projects to life. No hassles, no dramas.

Quality

We take no shortcuts to maintain high standards of our products and services, and our customers agree.

Value

Stone materials are sourced and imported by us to provide you with the best products at competitive prices.

Local Manufacturing

Receive accurate custom shapes with minimal wait times from our local manufacturing facility.

Natural Stone vs. Concrete

Feature

STONE

CONCRETE

Colour Availability

More than 20 stones to choose from

May available in many paint colours

Colour Longevity

Forever

Will fade or peel off

Workflow

All pre done

In situ concreting requires skills

On Site Arrangement

Sling or forklifting

Easy with anchor point

Cost

Low *

High

CO2 Emission

Low *

High

* stone costs from \$850/lm (Lx400mm width x 400mm straight)

* stone generates 14.8% CO2 when compared to cement.

02 Feature

Stone is relatively green.

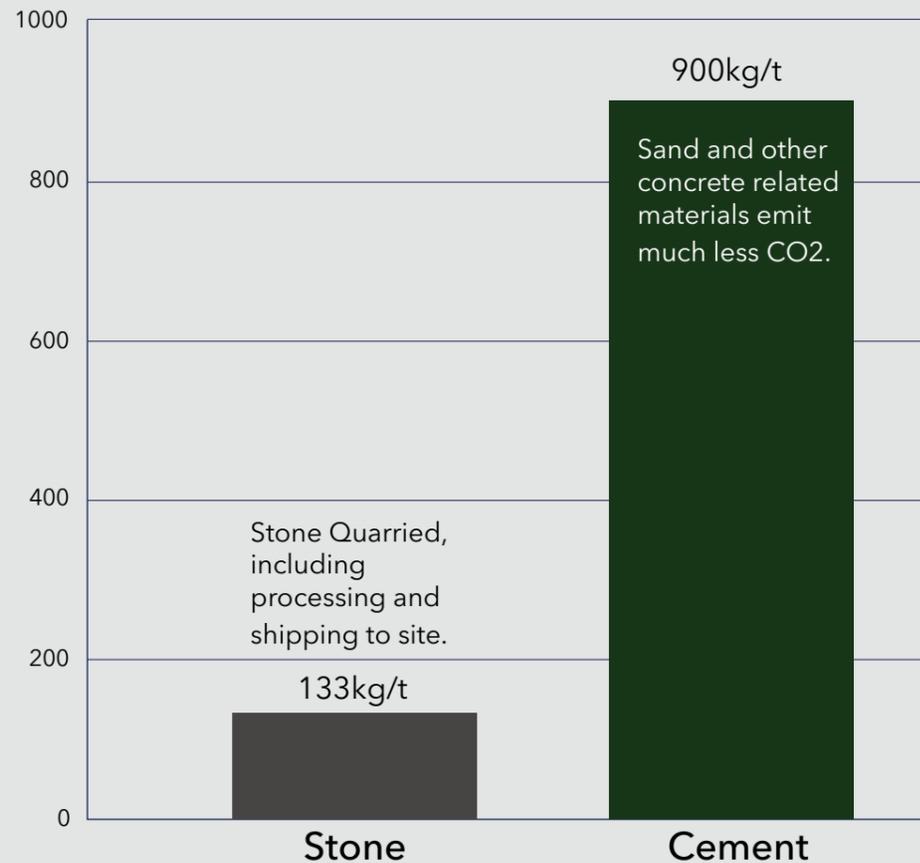

As a natural resource, the raw material itself attracts very little energy inputs.

The final product holds its stand after we put Quarrying / Processing / Land and Ocean Transporting in to consideration. (as per below graphic illustrated)

SAI also works with number of carbon neutral projects in Australia and Overseas, in this way we are able to offer a carbon neutral stone street furniture if required.

Neutral carbon, we promise.

CO2 emission

More complex, more you save.

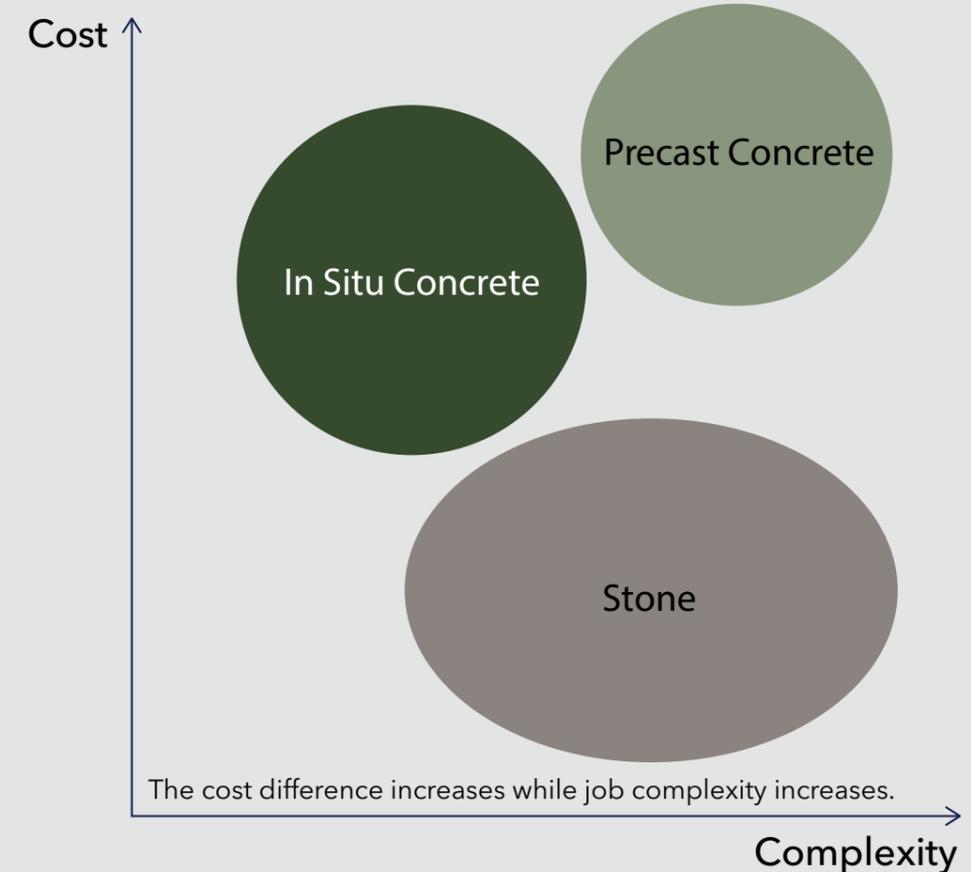

Hardscape construction can be challenging in a few ways, and SAI's natural stone street series may address these challenges for designer and contractors.

1, complicated in-situ concrete work, often requires highly skilled concreters, perfect weather and consistent mix

2, pre-cast concrete can easily light fire on budget, albeit this is a great method for its certainty, strength and level of details.

Stone customization is done overseas, each individual piece will all be handled by laser precise machinery and skilled stone mason.

The result is consistency, and flexibility.

Installation

Quick & Simple.

Sai Stone materials are not only aesthetically pleasing, they are also simple to install from start to finish. Have confidence you will be able to complete your project on time and on budget with us.

01 Confirm Colour/Material/Surface Finish

02 Approve

03 Setup dowel bars on concrete base prior to delivery

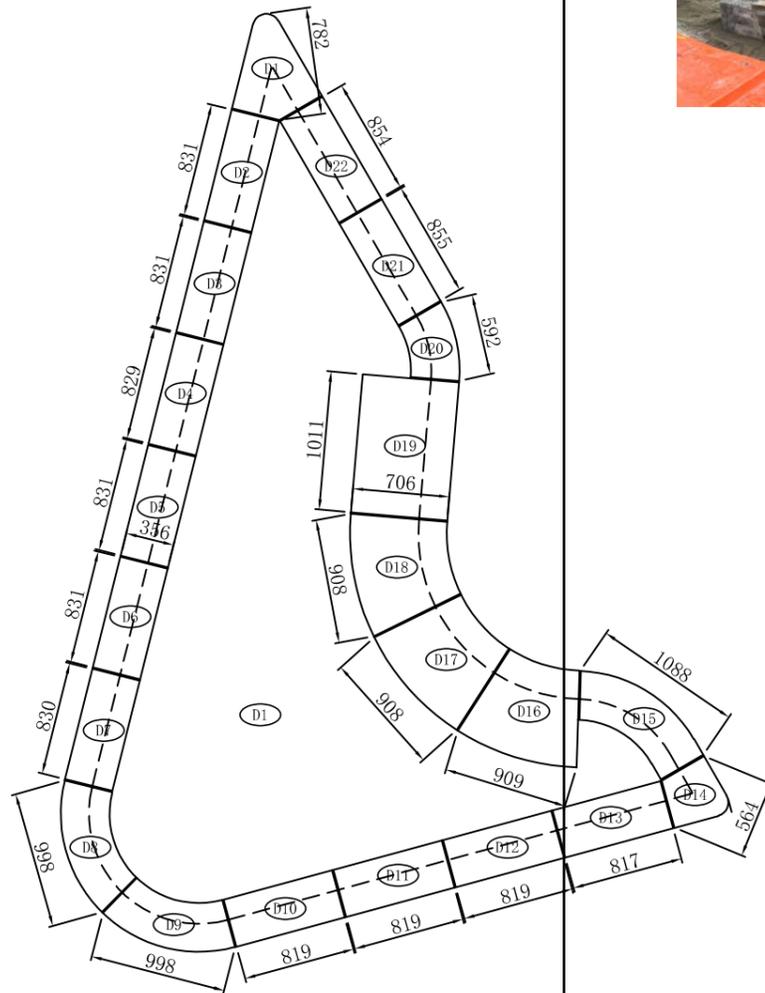

04 First delivery of stone materials arrives within 10 weeks

05 Sling into position, then use ChemSet(TM) (or similar product) to anchor

06 Clean and seal to finish

Projects

Queens Place

Marry function and aesthetics when you choose stone as your choice of material for street furniture.

SAI's products allow you to freely create according to the environment of your project, without hesitation or compromises. Using a natural stone material can also help make the surrounding space feel more inviting, enhancing the user experience for all walks of life.

Street Furniture:
Queens Place /
Raised garden beds &
Granite seats

Leopold Shopping Center

Stone benches can be implemented as staircases or retaining walls for a seamless, classic look that will never go out of style.

Stone materials blend in perfectly with its natural surroundings, fading into the background while enhancing the landscape design for maximum effect and beauty.

Street Furniture:
Leopold Shopping Center
Designed for Raised garden
beds and retaining walls

St Georges Aged Care

Bring outdoors indoors by implementing stone benches around raised garden beds. Stone not only helps make the environment feel less cold and sterile, it can also be used to create standalone feature bench seats. Stone benches are not only more pleasing to the eye compared to concrete, Sai Stone's stone benches also offer significant savings over pre-casted benches.
